

Mercy University Hospital, Centre of Nurse Education

Prospectus Autumn 2023

Mission Statement of the Centre of Nurse Education

The Centre of Nurse Education is committed to providing high quality, accessible education. We view education as a shared undertaking with teaching staff as facilitators and learners as active participants in their knowledge development.

Learning is a life-long process which enables individuals to think critically in the appraisal and application of knowledge, skills, and values as these relate to self, others, and the environment. This philosophy guides our values set out below.

- We seek to excel in the field of education ensuring that our programmes are accredited, progressive and empowering.
- We are accountable to our stakeholders through our collaboration, responsiveness and performance. We strive to act at all times with complete integrity and transparency
- Our service is based on an ethos of fairness and quality. Education is equitable, accessible, flexible and measurable.
- We value and respect each person's contribution, through trust, courtesy and collaboration.
- We continuously strive for innovative enhancement to the services we provide working in partnership with stakeholders for the good of the public.

Foreword

It is with pleasure that I welcome you to the Autumn 2023 edition of the Prospectus of the Centre of Nurse Education, Mercy University Hospital.

The availability of continuing education programmes has been prioritised in accordance with available resources and service needs. The Centre of Nurse Education produces a prospectus twice yearly, in Spring and Autumn. There are occasions when additional courses/study days are scheduled within the life span of the current Prospectus. In such cases, these will be advertised to relevant stakeholders prior to delivery.

The Centre of Nurse Education works in partnership with Higher Education Institutions, Nurse Midwifery Planning and Development and Nursing Practice Development Units. We seek appropriate validation and accreditation for programmes / units of learning from the relevant awarding bodies and from the Nursing & Midwifery Board of Ireland. All programmes are evaluated by learners and staff of the Centre of Nurse Education and revised as appropriate in partnership with relevant stakeholders.

Please feel free to browse the Prospectus where you will find information pertaining to the continuing professional education programmes offered, including the relevant contact details. I hope the courses on offer facilitate your continuing professional development needs. Our programmes will be delivered in accordance with the latest government and public health guidelines. For the academic term, the Centre of Nurse Education will use a blended learning approach to support the safe delivery of its continuous professional development programmes

Finally, I wish to acknowledge the support of my team and other visiting speakers in the development of this Prospectus. I wish all participants attending the programmes well and I look forward to seeing you in the Centre of Nurse Education, Mercy University Hospital.

Stay safe and well.

Yours sincerely

Ann Cummins

Director of Centre for Nurse Education, Mercy University Hospital

Staff

Ms Breeda Herlihy: Librarian

Ms. Mary Whitaker: Library Assistant

Access

The Library services and facilities are available to:

- All MUH staff
- Students on placement at MUH
- Those attending CNE courses

Role of the Library

The Library's role is to support evidence-based clinical practice and the learning, teaching and research needs of the MUH staff and other designated users. It attempts to do this by providing access to:

- A study area with facilities conducive to reading and study and research
- Print and electronic information resources both locally and remotely
- Instruction in library and information seeking skills

Information Resources

Books (Print): The Library has a large collection of books covering most medical, surgical, nursing and allied health subject areas. Other subject areas covered include Philosophy, Ethics, Sociology, Economics, Law, History, Business and Management. The books are on open access and are catalogued according to the Dewey Decimal Classification Scheme.

Journals (Print): In recent years the Library has cancelled many of its print journals subscriptions in favour of subscriptions to the online versions.

Online Journals: The Library provides online full-text access to thousands of journal titles.

Databases: The Library provides access to the main health sciences bibliographic and full-text databases.

Facilities

There is a spacious and well fitted out study area as well as a computer room comprising of 11 PCs. The PCs have full Internet access, the requisite up-to-date software and printing facilities. The Library also provides scanning and photocopying facilities. There is also a group study room with online access.

Services

Borrowing: Library users may borrow 6 books for a maximum period of two weeks.

Document Supply Service: The Library provides a quick and efficient Inter Library Loan/Document Supply Service. Most journal article requests are satisfied within 24 hours.

Information Skills Training: The Library provides training to groups and individuals to help them identify, locate, use and evaluate the information resources needed to support clinical practice, learning, teaching and research.

Links and Partnerships

In the planning, delivery and evaluation of professional development programme's the Centre works collaboratively with:

- Nursing Midwifery Planning and Development Unit (Cork/Kerry)
- Office of the Nursing and Midwifery Services Directorate
- Catherine Mc Auley School of Nursing & Midwifery, University College Cork
- Dublin City University
- Nurse Practice Development Unit, Mercy University Hospital
- Directors and Assistant Directors of Nursing and Public Health Nursing
- Advanced Nurse Practitioners, Clinical Nurse Specialists

Information for course participants

Directions to the Centre of Nurse Education, Mercy University Hospital

Address: 34 Henry Street Cork

Tel: 021 4935184

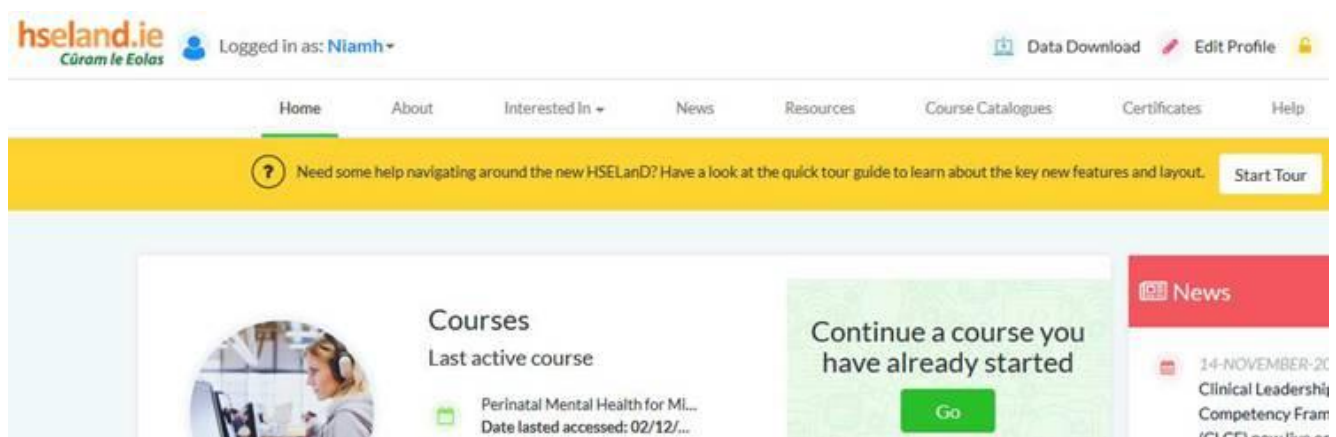

For directions to the Mercy Hospital, please go to www.muh.ie on the right hand side under "quick links" go to "get directions". The Centre of Nurse Education is on Henry Street, left hand side (glass fronted 3 storey building, see image on the cover of prospectus)

The Application Process

Course places are available to registered nurses and healthcare personnel in the public and private health care systems and voluntary sector

Participants are able to enrol on available courses through HSEland by following the below steps;

1. Login to <https://www.hseland.ie>
2. Register/edit your profile (top right hand corner, see box below)
3. Click on ‘Course Catalogues’ (one of the headings, see below)

4. Scroll down and click on ‘ONMSD’ (see box below)

5. Click on ‘Centre of Nurse Education, Mercy University Hospital, Cork’
6. Click on your place of work
7. Click on the course you wish to attend from the list of courses
8. Choose the date you wish to attend and click ‘Enrol’
9. Provide the information requested
10. Please allow a few days for application approval. Please check your spam folder if approval is delayed.

What happens if a course is deferred?

A course will be postponed if the minimum number of attendees has not been reached. This will take effect one week before commencement date of programme. Every effort will be made to ensure a programme continues but if unforeseen circumstances occur (eg in unprecedented weather conditions) courses may be subject to cancellation at very short notice. **All programmes will automatically be cancelled without notice in a RED ALERT.** Each attendee will be contacted as soon as feasible of the cancellation by the Centre of Nurse Education at the telephone number listed on the application form.

Fees

Registered Nurses working in the Private Sector are welcome to access programmes advertised within this brochure for a fee, please contact Lorna Paterson.

Parking

Parking options

Option 1:

St. Finbarr's Car Park, Wandesford Quay (the bridge before the River Lee Hotel bridge) (Open 24 hrs)
Tel: 4975265 –

Street parking -1 hour limit. You can buy a parking disc in the Mercy University Hospital shop which is located on the 2nd floor of the hospital.

Option 3:

Check <http://www.cork.ie/gettinghereandaround/citycarparks/>

Note:

Rates and opening times are correct at the time of printing; they maybe subject to change

DISCLAIMER for the PROVISION of EDUCATION/TRAINING by the MUH CNE

Attendance and/or participation in continuous education programmes which are provided by, or on behalf of the CNE are subject to the following terms and conditions:

Continuous Education Programmes are developed solely for the purposes of the CNE's requirements in the interests of protecting and improving the health of the public in respect of the knowledge and training of nurses and other employees of a healthcare provider who are engaged in a healthcare environment (whether public and/or private).

In light of these purposes, programmes are intended to provide educational information to aid and augment an understanding of the theoretical subject matter presented and/or the practical application of certain skills and competencies.

It is the individual responsibility of each practitioner to assess and maintain his/her own competence in respect of any situation and to assess the limitations of his/her competence. Programmes are not intended to affect, interfere with or limit a person's individual responsibility to practice safely and effectively within his/her scope of practice and in accordance with any local policies, guidelines and/or protocols which may exist.

The CNE shall have no liability, whether in (a)contract, (b)tort, (c)statute or (d)otherwise, for any injury, loss, damage or claim arising out of, or in connection with, any person's attendance and/or participation in programmes including but not limited to the subject matter thereof and/or arising out of the use of any handbooks, guidance notes, other documentation, oral presentations/demonstrations, web-based learning tools or any other instruction or materials provided as part of this course (the "Materials"), howsoever arising.

Any Materials provided by the CNE as part of this programme are provided for information and guidance purposes only. The CNE makes no representation, assurance, warranty or guarantee of any kind whatsoever in relation to the Materials. The provision of the Materials is without prejudice to the obligation of persons attending and/or participating programmes to continually develop themselves as professionals, where applicable.

These terms and conditions are without prejudice to the operation of the Clinical Indemnity Scheme and the professional responsibilities of any persons attending and/or participating in this programme.

Medication Management	32
Neurogenic Bowel Dysfunction for individuals with spinal cord injury	33
National Frailty Education Programme Workshop	34
National Systemic Anti-Cancer Therapy (SACT) programme for Oncology Nurses	35 - 37
New Graduate Transition Programme	38
Preceptorship	39- 40
Type 2 Diabetes Workshop	41 - 42
Wound Care Conference	43

Adult Peripheral Intravenous Cannulation Programme

Aim: The aim of this national programme is to enhance the knowledge and skills of registered nurses in relation to the theory and practice of intravenous (IV) Cannulation in adults.

Content: A blended learning approach is taken. The theoretical component can be accessed by registered nurses online via the HSE e-learning website www.hseland.ie and the practical components are delivered via the supervised practice workshops in the Centre of Nurse Education.

Intended Learning Outcomes:

On completion of the programme participants will be able to:

- Discuss the Scope of Nursing and Midwifery Practice Framework (NMBI 2020) as it pertains to the role of the nurse in the practice of adult IV cannulation.
- Discuss the theory and key skills pertaining to IV cannulation in adults.
- Discuss the importance of infection control measures in the practice of IV cannulation.
- Demonstrate and maintain competence in the skills pertaining to adult IV cannulation post skills demonstration and practice in the classroom setting and supervised assessment in the clinical setting.

Accreditation: 3 CEUs

No of Places: 8

Target Audience: Registered nurses working in the health service.

Facilitators: Centre of Nurse Education teaching staff

Participant Pre-requisites:

- Hand Hygiene Training must be completed within the last 2 years.
- Completed a full Medication Course (including IV Medication Training) and a refresher course every 2 years.
- A policy in the Organisation to support the Registered Nurse in the practice of Adult Peripheral Intravenous Cannulation
- A clinical assessor nominated by the organisation to supervise and support the participant to complete the clinical competency assessment.
- Participants are to access and complete the theoretical component of the Adult IV Cannulation Programme via www.hseland.ie and complete the online assessment.
- **Copy of successful online assessment grade is to be presented by the participant to Lecturer on arrival at the Centre of Nurse Education .**
- **Complete and return Clinical Competency form to the CNE within 12 weeks of completion of the programme**
- Failure to return completed competency form to the Centre of Nurse Education within 12 weeks of completion of the programme will require the learner to repeat the component of the Adult Peripheral Intravenous Cannulation programme via www.hseland.ie, complete the online assessment, undertake again the practical component in the CNE and repeat supervised practice within the participant's organisation again.

Date	Venue	Time	Duration
17 th October 2023	Centre of Nurse Education, 34 Henry Street, Cork	10—1pm	3 Hours

*Programme Application is via Classroom Management System on www.hseland.ie

Adult Venepuncture

Aim:

The aim of the workshop is to enhance the knowledge and skills of registered nurses in relation to the theory and practice of Adult Venepuncture.

Content:

A blended learning approach whereby the theoretical component can be accessed by registered nurses online via the HSE e-learning website www.hseland.ie and the practical components are delivered via the supervised practice workshops in the CNE.

Intended Learning Outcomes:

On completion of the programme the participants will:

- Discuss the Scope of Nursing and Midwifery Practice Framework (NMBI 2020) as it pertains to the role of the registered nurse and the practice of adult venepuncture
- Discuss the theory and key skills pertaining to adult venepuncture
- Discuss the importance of infection control measures in the practice of adult venepuncture
- Demonstrate competence in the skills pertaining to adult venepuncture on return to their work settings, following skills demonstration and supervised practice
- Understand the potential complications of adult venepuncture and manage effectively.

Accreditation:

NMBI 3 CEUs

No of Places Available:

6

Target Audience:

Registered Nurses working in the Irish Health Service registered with NMBI

Facilitators:

Teaching Staff of the Centre of Nurse Education, Mercy University Hospital, Cork

Pre-requisites:

- Current Policy in place in the employee's organisation to support the Registered Nurse in the procedure of Adult Venepuncture
- A clinical assessor nominated by the organisation in advance of attendance at programme to support and mentor the participant to complete the competency assessment.
- Participants are to access and complete the theoretical component of the Adult Venepuncture Programme via www.hseland.ie and complete the online assessment.
- Each participant needs to pass the online assessment in advance on HSEland in order apply and to undertake the practical component of the programme in the Centre of Nurse Education
- Copy of online assessment result/grade is to be presented by the participant to the Programme Facilitator on arrival at the Centre of Nurse Education
- Participants who do not present the assessment result/grade cannot undertake the practical component of the Venepuncture Programme
- This programme is designed only for Registered Nurses with the Nursing and Midwifery Board of Ireland (on the live register)
- Hand Hygiene Training must be completed within the last 2 years.

- **Complete and return Competency of Skill form to the Centre of Nurse Education within 12 weeks of completion of the programme.**
- *Failure to return completed competency form to the Centre of Nurse Education within 12 weeks of completion of the programme will require the learner to repeat the component of the Adult Venepuncture Programme via www.hseland.ie, complete the online assessment, undertake again the practical component in the CNE and repeat supervised practice within the participant's organisation again.
- All sections competency form must be completed by the participant and nominated supervisor

Anaphylaxis Training for Healthcare Professionals

Aim:

To prepare healthcare professionals to correctly recognize and effectively manage patients who develop an anaphylactic reaction.

Prerequisites:

The Anaphylaxis Programme is available on HSELand. Staff wishing to complete this course for the first time must complete the on-line version first. Then within 3 weeks of completion they should complete the one and a half hours skills component of this course at their local Centre of Nurse Education (CNE). They should book their skills component of this course first in the CNE via HSELand to ensure they can be offered a place within 3 weeks of completing the on-line component.

Participants must have completed a BLS Programme for Healthcare Providers within the past 2 years. If you require a refresher course on BLS in advance of attending for Anaphylaxis programme please view BLS programme availability on Classroom management System on HSELand

Workshop (2 hours)

- Anaphylaxis Quiz (Pre-Workshop)
- Preparing and drawing up 1st line medications
- Case management scenarios of adult, child and infant who develop an allergic reaction/anaphylactic reaction

Intended Learning Outcomes:

On completion of the programme the participants will:

1. Differentiate between severe allergic reaction and anaphylaxis
2. Discuss the management of the care of infants, children and adults with anaphylaxis
3. Demonstrate the calculations and preparation of appropriate drugs under current medication protocol
4. Discuss current RCPI National Immunisation Guidelines and other current evidence for the management of Anaphylaxis
5. Be knowledgeable of national guidelines for the management of Anaphylaxis

Accreditation:

NMBI 3 CEU's

NB: The online HSELand programme should be completed as a refresher every 2 years.

No of Places:

Please see Classroom Management System on HSELand for programme availability

Target Audience:

Nurses from all disciplines working in the public, voluntary and private sector

Facilitators:

Teaching staff at the Centre of Nurse Education, Mercy University Hospital, Cork

Date	Venue	Time	Duration
31 st August	Centre of Nurse	11.45am – 1.45pm	2 hours

Basic Life Support for Healthcare Providers (BLS)

Aim:

To teach the principles and techniques of Basic Life Support for Adults, Children and Infants

Content:

Introduction:

- 2020 AHA BLS Guidelines
- Adult BLS skills
- Use of Automated External Defibrillator
- Child BLS skills
- Infant BLS skills
- Adult, Child and Infant foreign body airway obstruction
- Management of victims of stroke and heart attack

Intended Learning Outcomes:

On completion of the programme the participants will:

- Discuss 2020 AHA guidelines for CPR and emergency cardiovascular care
- Initiate the chain of survival with emphasis on team management
- Perform prompt, high-quality CPR and safe use of an AED in a cardiac arrest situation (adult/child/infant)
- Perform rescue breathing for patients who develop respiratory arrest (adult/child/infant)
- Manage the choking of an adult, child or infant.
- Recognise victims of stroke/heart attack and seek appropriate help.

Best Practice In Intellectual Disability Conference

Aim: The Centre of Nurse Education, Mercy University Hospital is pleased to announce the Best Practice in Intellectual Disability Nursing Conference 2023 which will be hosted at the Centre of Nurse Education, Mercy University Hospital on Tuesday 21/11/23

Content: A diverse group of speakers will present evidenced based theory and practice to Registered Nurses who work with People with Intellectual Disability in a variety of settings.

A selection of topics will include:

- Person Centred Planning
- Assisted Decision Making Act
- Mental Health and Intellectual Disability
- Understanding and responding to Behavioural Challenges
- Communication

Intended Learning Outcomes:

At the end of this one day conference participants will have gained competence and knowledge in supporting people with an intellectual disability in several key areas identified.

Accreditation: Category 1 Approval, 7 CEU's (awaiting accreditation)

No of Places: 60

Target Audience: Registered Nurses supporting People with an Intellectual Disability

Facilitators: Teaching Staff of the Centre of Nurse Education, Mercy University Hospital, and invited guest Speakers

Date	Venue	Time	Duration
21 st November 2023	Centre of Nurse Education, 34 Henry Street, Cork	08.30- 16.30	8 hours

*Programme Application is via Classroom Management System on www.hseland.ie

Catheterisation -Supra-Pubic Catheter Change (Adults) Programme

Day 1- Supra-pubic catheter change theory session held in the Centre of Nurse Education

Day 2- Supra-pubic catheter change workshop held in the Centre of Nurse Education

Aim:

The aim of the course is to enhance the knowledge and skills of registered Nurses in relation to the theory and practice of supra pubic catheterisation and enable the nurse practice competently.

Content:

- Standard precautions and appropriate PPE (Covid 19)
- Aseptic Technique
- Best practice in Supra Pubic Catheter Care
- Theory and practice of Supra Pubic Catheterisation
- Catheter-associated Urinary Tract Infection (CAUTI) Bundle of Care
- Supervised Practice Workshop

Intended Learning Outcomes: *On completion of the programme the participants will:*

- Demonstrate an understanding of the Scope of Nursing and Midwifery Practice Framework (NMBI 2020) as it pertains to the role of the registered Nurse and the procedure of Supra-Pubic Catheterisation
- Understand the theory and key skills pertaining to Supra-Pubic Catheter change and management of care
- Understand the importance of infection prevention and control in the procedure of Supra-Pubic Catheter care
- Apply Catheter Associated Urinary Tract Infection (CAUTI) Bundle of Care
- Understand the potential complications of Supra-pubic catheter change and management of care
- Develop competence in the skills pertaining to Supra-pubic catheter care and catheter change (on return to their work settings), following skills demonstration and supervised practice

Prerequisites:

Enrolment is not permitted unless you have taken all of the modules/programmes listed below:

- ANTT Aseptic Non-Touch Technique
- Hand Hygiene for HSE Clinical Staff
- Donning & Doffing of PPE in community healthcare settings
- Introduction to Infection Prevention and Control

Attendees are required to complete pre course reading including:

- Code of Professional Conduct and Ethics for Registered Nurses and Registered Midwives (2014)
- Scope of Nursing & Midwifery Practice Framework (2020)

Assessment:

- There will be a knowledge assessment of course content at the end Day 1 of this programme
- Supervised practical skill assessment will be completed on Day 2 with feedback to participants
- Participants must submit completed competency assessment document within 6 months of course dates to the Centre of Nurse Education in order to receive certificate of programme completion

Accreditation: Category 1 Approval, 7 CEU's

No of Places: 12

Target Audience:

Registered Nurses caring for Patients with supra pubic catheter in situ, supported by organisation's evidence based policy in place.

Facilitators: Centre of the Nurse Education Mercy University Hospital teaching Staff

Date	Venue	Time	Duration
5 th October (Theory)	Centre of Nurse Education, 34 Henry Street, Cork	9am – 2.30pm	5 ½ Hours
October 9 th or 10 th or 11 th (Workshop)		9.30am – 12.30pm	3 Hours

*Programme Application is via Classroom Management System on www.hseland.ie

Catheterisation- Urethral catheterisation in Females / Males (Adults) Programme

Aim:

The aim of the course is to enhance the knowledge and skills of registered Nurses in relation to the theory and practice of adult male and female urethral catheterisation and enable the nurse practice competently.

Content:

Day 1 Theory

- NMBI Professional Guidelines including Code of Professional Conduct & Scope of Nursing & Midwifery Practice.
- Revision of the anatomy and physiology of the adult female and male genito-urinary tract
- Indications, contra-indications and complications of adult male and female urethral urinary catheterisation

- Evidence based knowledge and skill of adult male and female urethral urinary catheterisation

Day 2: Practical

- Practical Workshop on adult male and female urethral urinary catheterisation: Skills demonstration and supervised skills practice for each participant.
- Knowledge assessment
- Discussion on the Skills competency form for work settings
- Evaluation

Intended Learning Outcomes:

On completion of the programme the participants will:

1. Demonstrate an understanding of the Scope of Nursing and Midwifery Practice Framework (NMBI 2020) as it pertains to the role of the Registered Nurse and the procedure of adult male and female urinary catheterisation.
2. Understand the theory and key skills pertaining to the procedure of adult male and female urethral Catheterisation
3. Understand the importance of infection prevention and control in the procedure of adult male and female urethral catheterisation.
4. Develop competence in the skills pertaining to male and female urethral catheterisation on return to their work settings, following skills demonstration and supervised practice
5. Understand the potential complications of male and female urethral catheterisation and manage risk effectively.

Accreditation:

NMBI Category 1, 8 CEUs

No of Places Available:

12

Target Audience:

Registered Nurses caring for adult male and female patients with urethral catheter in situ, supported by organisation's evidence-based policy in place.

Facilitators:

Centre of the Nurse Education Mercy University Hospital teaching Staff

Pre-requisites:

Participant:

- Current Registration with Nursing and Midwifery Board of Ireland
- Revision of the anatomy and physiology of the urinary system
- HSELand ANTT course
- HSELand Hand Hygiene up to date

Organisation:

- Evidence based practice guidelines/policy in relation to catheterisation must be in place to support the registered nurse
- Clinical supervisor is nominated to supervise practice and complete competency assessment

Assessment:

- There will be a knowledge assessment of course content at the end of this programme
- Practice of skills with supervision and feedback to participants

Date	Venue	Time	Duration
12 th September (Theory)	Centre of Nurse Education, 34 Henry Street, Cork	9am – 2.30pm	5 ½ Hours
September 13 th or 14 th or 18th (Workshop)		9.30am – 1.30pm	4 Hours

*Programme Application is via Classroom Management System on www.hseland.ie

Clinical Leadership Programme for Staff Nurses

Aim: The aim of this programme is to facilitate participants develop leadership knowledge and skills. Clinical leadership for nurses and midwives is concerned with demonstrating clinical excellence, supporting, and guiding colleagues and championing the distinct and equal contribution of nursing and or midwifery within multidisciplinary contexts.

This two-day clinical leadership development programme offers staff nurses and staff midwives a clinical leadership foundation programme. A blended learning approach supports interactive online engagement and self-directed reflective learning using a programme workbook. Facilitators guide participants to engage in group discussions, thereby providing opportunities for shared learning and collaboration

Content: Definitions of clinical leadership;

Introduction to and discussion of Clinical Leadership Competency Framework (CLCF) and Digital Healthcare . Clinical Leadership Competency Framework (CLCF) consists of seven clinical leadership competencies: self-awareness; communication, decision making, empowerment, quality and safety, advocacy and teamwork. Nurses will be enabled to assess their leadership strengths and development needs and will be supported to record their learning using the digital professional plan.

Intended Learning Outcomes: Participants will:

- Understand the importance of self-awareness in clinical leadership.
- Explore core values that may impact on clinical leadership.
- Demonstrate personal effectiveness through communication.
- Build confidence by cultivating empowerment and advocacy.
- Understand the importance of decision making to promote quality improvement.
- Explore the impact of teamwork on patient care.
- Recognise the importance of self-care as a clinical leader.

Accreditation: NMBI CEUs 14.

No of Places: minimum 10 and maximum 25

Target Audience: all staff nurses, PHNs working in Acute care, continuing care, community care, and intellectual disability services.

Facilitators: Elizabeth Myers, Specialist Co Ordinator, Nurse Tutor, MUH CNE, Siobhan Buckley, Nurse tutor, MUH CNE.

Date	Venue	Time	Duration
November 6 th & 6 th December 2023	Centre of Nurse Education, 34 Henry Street, Cork	9am – 5pm	16 hours

*Programme Application is via Classroom Management System on www.hseland.ie

Continence management of the child and young person (National programme)

Aim: The aim of the programme is to enhance healthcare professionals' understanding of continence assessment and promotion in children and young people, using current evidence base.

Content: The education programme comprises eight sessions which include PowerPoint presentations, group discussions, reflections, video clip, and case studies workshop. This education provides healthcare professionals with an understanding of continence in children and young people, thereby supporting earlier recognition of delayed toilet training and improving outcomes for children, young people and their families.

Intended Learning Outcomes:

- develop an understanding of a whole-family approach to continence promotion in the child or young person
- understand the principles of assessment for toilet training readiness and continence management
- explore the management of continence in children and young people who have additional needs
- discuss and explore the common bowel and urinary problems in children, such as constipation, soiling and enuresis
- apply appropriate pathways for continence assessment, management and referral.

Accreditation: 7 CEU's

No of Places: 30

Target Audience: Healthcare professionals, in particular registered Nurses involved in Continence assessment and promotion in children or young people.

Facilitators: Teaching Staff of the Centre of Nurse Education, Mercy University Hospital, Cork Rachel Long, Ann Cummins, Louise Newcombe

Date	Venue	Time	Duration
18 th October 2023	Centre of Nurse Education, 34 Henry Street, Cork	08:50-16:30	7.5 hrs

*Programme Application is via Classroom Management System on www.hseland.ie

Ear Care programme

Aim:

Registered Nurses will apply the evidenced based knowledge and skill as it pertains to Adult Ear Care Management into their Nursing Practice

Content:

- Anatomy and physiology of the ear,
- Causes of common ear problems, the role of cerumen,
- Aural and risk assessment and use of otoscope,
- Practice of ear irrigation,
- Special precautions pre, peri and post procedure,
- Advice given to client

Programme Delivery

The programme is designed for facilitation as either classroom based or blended learning programme. This is a co-facilitated programme with CNE Educator and Clinical Practitioner competent in ear exam and ear irrigation.

Part 1 consists of theory delivery classroom/on-line education platform e.g. Webex Events or Microsoft Teams.

Part 2 is a skills-based workshop hosted in the Centre of Nurse Education.

Intended Learning Outcomes:

On completion of the programme the participants will:

- Confidently advise patients about ear hygiene and preventable measures in management of ear wax.
- Critically evaluate the current methods used for ear wax removal and reflect on the most appropriate method for individual patient centred care.
- Appreciate the nurses' accountability in undertaking patient ear examination and irrigation in their clinical setting.
- Demonstrate competence in completing ear assessment and irrigation documentation.
- Have better understanding of the issues faced by individuals whose hearing is affected and the resources and agencies that are available to them.
- Demonstrate safe and proficient technique for ear examination with otoscopy and the removal of impacted ear wax while appraising their own practice

- Outline the special care precautions pre, peri and post ear irrigation procedure
- Discuss the information/advice given to the Individual following ear irrigation procedure and preventive measures regarding cerumen formation

Participants must submit completed competency assessment document within 3 months of course dates to the Centre of Nurse Education in order to receive certificate of programme completion

Enhancing and Enabling Well-Being for the Person with Dementia National Programme

Aim:

To provide participants with a foundation to improve the well-being of the person with dementia

Content:

- Overview of Dementia
- Ageing & Memory
- Dementia and Human Rights
- Delirium and Issues arising
- Nutrition and Dementia
- Creating a dementia friendly environment
- Person centred communication in dementia care
- Supporting the person living with dementia experiencing non cognitive symptoms
- Person Centred Care
- Palliative Care and the person with Dementia

Intended Learning Outcomes:

On completion of the programme the participants will:

- Describe the normal ageing process
- Describe dementia
- Explain the impact the progression of dementia has on a person and their families
- Recognise the impact the environment has on the person with a dementia and their carers
- Discuss person-centred care
- Enhance quality of life for the person with dementia
- Identify the main principles of communicating with the person with dementia
- Identify and respond to changes in behavior creatively

Accreditation:

NMBI 12.5 CEU's

No of Places Available:

21 Places

Target Audience:

All Healthcare staff from Community Hospitals in Cork who will be expected to undertake work based activities during the programme

Facilitators:

Staff of the Centre of Nurse Education, Mercy University Hospital and invited guest speakers.

Date	Venue	Time	
Day 1: 9 th November 2023	Centre of Nurse Education, 34 Henry Street, Cork	8.30am – 5pm	
Day 2: 6 th December 2023		9am – 5pm	

Enteral Feeding and Tube Management

Aim: To provide education and training on enteral feeding and tube management

Content:

Day 1 Theory

- Overview of enteral feeding, acute and community perspectives
- Gastrostomy tube types and their management
- Infection Control Considerations
- Administration of Medications via enteral tubes
- Procurement of Enteral Tubes/Ancillaries for Patients
- Enteral Feeding Tubes

Day 2 Practical Workshop

- Tube Types and Trouble Shooting
- Accidental Tube Removal
- Aspiration and PH Testing
- Feed Types

Intended Learning Outcomes:

At the end of this programme attendees will:

- List indications for enteral feeding
- Identify types of enteral feeding tubes and delivery methods
- Be able to assess enteral feeding site
- Recognise complications associated with enteral feeding and treat as appropriate
- Adhere to appropriate Infection Prevention and Control guidelines
- Understand procurement process
- Adhere to medication management guidelines, identify drug and enteral feed interactions, how to administer medications enterally and identify suitable medication formulations for administration

Accreditation: Category 1 Approval, 9 CEU's

No of Places: 20

Target Audience: Registered Nurses and Dieticians

Facilitators: Nurse Tutors, Clinical Nurse Specialists, Pharmacist, Clinical Advisor, Dietician, Assistant Director of Public Health Nursing, Infection Prevention and Control Assistant Director of Nursing

Date	Venue	Time	Duration
21 st September (theory)	Centre of Nurse Education, 34 Henry Street, Cork	09.45 – 15.00pm	5 hours 15min
10 th October (workshop)		10.00am – 15.00pm	5 hours

Infection Prevention and Control Link Practitioners Programme.

Aim: The principle aim of this programme is to provide the Infection Prevention and Control (IPC) link practitioner with an opportunity to advance and practice their knowledge and skill safely in infection prevention and control in contemporary healthcare practice. Existing National Infection Prevention & Control Guidelines and National IPC-e-learning modules will facilitate further learning and support.

Content: This programme will provide a blended learning approach incorporating e-learning programmes, live webinars integrated with classroom-based workshops.

Indicative content includes

- Core Knowledge and Skills in IPC
- Managerial Issues in IPC
- IPC Resources
- RESIST Hand Hygiene Train the Trainer for Healthcare Workers in Community and Primary Care
- Audits & Quality Improvement in Infection Prevention & Control

The timetable for the foundation programme is based around the following five themes:

Day 1- Introduction to Infection Prevention & Control

Day 2-Standard & Transmission Based Precautions

Day 3- IPC Risk Assessment & Antimicrobial Resistance

Day 4- Management & Governance of Infection Prevention & Control

Day 5- National Hand Hygiene Trainer the Trainer Programme incorporating PPE demonstration

Intended Learning Outcomes:

1. Discuss the principles and practices of infection prevention & control recognising and promoting evidence-based practices that reduce transmission risks
2. Understand the principles of Standard and Transmission Based Precautions
3. Discuss the principles of antimicrobial stewardship
4. Discuss the national, international and local policies as applied to IPC.
5. Develop capability to assess and manage IPC risk within their own health / social care environment
6. Understand the importance of audits in clinical practice and their impact on quality improvement
7. Conduct nationally standardised and local level IPC audits
8. Develop confidence and skills to educate/train colleagues in IPC practice

Accreditation: 35 CEU's

No of Places: 20.

Target Audience: The target audience for this programme is registered nurses or health and social care professionals who are involved with direct patient care and invasive procedures within the health and social care community setting. *Ideally, participants will be at CNM1 / CNM2 / senior HSCP level or above, with the authority to influence infection prevention and control within their facility.*

Facilitators: This programme is a collaboration between the Regional Centres of Nursing and Midwifery Education working in partnership with CHO Assistant Directors of Nursing in Infection Prevention & Control. Contributions from expert speakers, for example Infection Prevention and Control Nurses and CHO Antimicrobial Pharmacists, will support the programme.

Date	Venue	Time	Duration
25 th - 29 th September, 2023	Online- 25 th -27 th September. Classroom- 28 th September in Centre of Nurse Education, 34 Henry Street, Cork Online- 29 th September.	9am-5pm daily	5 days

Intramuscular Injection Technique

Aim: The aim of the course is to enhance the knowledge and skills of Registered Nurses in relation to the theory and practice of intramuscular injection.

* The Intramuscular Injection technique will be delivered back-to-back with most of our Anaphylaxis programmes if you wish to attend both programmes on the same day. Application for both programmes is required if you wish to attend both.

This programme may be of benefit to nurses who are preparing as vaccinators.

Content:

- Relevant national and local guidelines relevant to IM Injections
- Revision of the anatomy and physiology of sites for intramuscular injections.
- Indications and complications of administration of medication via the intramuscular route.
- Evidence based knowledge and skills in administration of medication via the intramuscular route
- Practical workshop on administration of medication via the intramuscular route: Skills demonstration and supervised skills practice for each participant.

Intended Learning Outcomes:

At the end of this programme the participant should be able to:

- Discuss the context of administering intramuscular injections and associated benefits and potential risks.
- Discuss best practice in the administration of intramuscular injections.
- Demonstrate competence in the administration of intramuscular injections in the workplace setting.
- Safely and effectively manage patients who require administration of intramuscular injections in accordance with their own scope of practice and local practice guidelines

Accreditation: Category 1 approval NMBI, 2 CEU's

No of Places: See Classroom Management System on HSELand for availability

Target Audience:

Registered Nurses caring for Adult Patients requiring administration of medication via the intramuscular route, supported by organisation's evidence-based policy in place.

Facilitators: Staff of the Centre of Nurse Education, Mercy University Hospital

Date	Venue	Time	Duration
31 st August 30 th November	Centre of Nurse Education, Cork	9-11am	2hours

Management of neurogenic bowel dysfunction for individuals with spinal cord injury

Aim:

The aim of this course is to provide Registered Nurses with the theoretical knowledge required for the practical management of individuals with Neurogenic Bowel Dysfunction (NBD)

Intended Learning Outcomes:

Following this programme, the nurse will be able to:

- Outline the options for individual management of neurogenic bowel
- List the aims of a bowel care programme
- Outline the complications of bowel care and how these can be treated
- Provide an individual bowel care programme for the SCI population, taking in to account any complications that may occur.

Please note attendees will require an identified competent Nurse/ Continence Adviser to complete their clinical competency post this theoretical programme

Accreditation: NMBI - 6 CEUs

No of Places: 12

Target Audience: Community RGNs, PHNs and Acute Nurses working with individuals with neurogenic bowel dysfunction, requiring bowel care.

Facilitators: Nurse Tutor and External Facilitators

Date	Venue	Time	Duration
25 th September 2023	Centre of Nurse Education, 34 Henry Street, Cork	08:30-14:30	6 hours

*Programme Application is via Classroom Management System on www.hseland.ie

National Frailty Education Programme Workshop

Aim:

The programme aims to provide healthcare professionals with an enhanced understanding of frailty and frailty assessments, thereby ensuring earlier recognition of frailty, improved healthcare management and better health outcomes for frail older adults.

Content: Includes assessment of frailty syndromes, frailty, falls, immobility, delirium, cognitive impairment, comprehensive geriatric assessment, continence, nutrition and polypharmacy.

Intended Learning Outcomes include:

- Have improved understanding and knowledge of the concept of frailty
- Have enhanced skills and knowledge in identifying the frail older adult
- Understand the need for Comprehensive Geriatric Assessment and how it improves outcomes for frail older adults.

Accreditation: Category 1 approval NMBI, 20 CEU's

No of Places: 20

Pre-requisites:

Participants:

1. Current Registration with Nursing and Midwifery Board of Ireland, NMBI or regulatory organisation depending on profession.
2. The National Frailty Education Programme is available on HSELand as an e-learning programme. Completion of 7 modules of National Frailty Education programme in advance of attending workshop is mandatory before registration for workshop.

Date	Venue	Time	Duration
11 th September 2023	Centre of Nurse Education, 34 Henry Street, Cork	10.00-13.30	3.5 hours
2 nd November 2023		10.00-13.30	3.5 hours

Target Audience: Nurses from all disciplines working in the public, voluntary and private sector and all members of the multidisciplinary team.

National Systemic Anti-Cancer Therapy (SACT) programme for Oncology Nurses

Aim:

The aim of the 'National Systemic Anti-Cancer Therapy (SACT) Competency Programme for Nurses Working in Cancer Care' is to standardise the education and assessment of SACT administration and patient care, ensuring consistently safe and high-quality SACT practice. SACT nurses who have previously achieved competence against all learning outcomes of the Passport should complete an annual Re-accreditation Competency Certificate and managers should verify that this has been undertaken and achieved. SACT nurses who have previously achieved competence against all learning outcomes of the Passport and are returning to SACT practice after a break for a period of six months or more should revise, or re-complete the Passport, along with the annual Re-accreditation Competency Certificate to ensure ongoing currency of their competence, reassuring Managers that the nurses SACT competence is current.

Programme Overview

The National SACT Competency Programme is a continuous professional development programme with Category 1 approval from NMBI, equating to 16 CEU's.

There are four steps to competency attainment:

1. Attending the 2-day training programme to cover prerequisite theoretical learning (virtually, in the classroom or through blended learning).
2. Completion of the theoretical sections of the UKONS Passport. The theoretical section is designed to be marked by a nurse in practice e.g., Clinical Facilitator/Educator, Course Co-ordinator, Advanced Nurse Practitioner (ANP), Clinical Nurse Specialist (CNS) or Clinical Nurse Manager (CNM) who is an approved SACT assessor.
3. Completion of the clinical practice competency sections of the UKONS Passport with an approved SACT assessor.
4. Completion of the UKONS SACT Safe Handling and Administration Certificate and then annual completion of the Re-accreditation Competency Certificate and submission to HSELand to ensure the nurse remains a competent SACT administrator.

Intended Learning Outcomes:

Refer to the UKONS SACT Competency Passport Learning Outcomes Framework (2019) for the learning outcomes for each of the six subjects included in the passport:

Subject 1: Foundation Skills

Subject 2: Administering Oral SACT

Subject 3: Administering Intramuscular (IM) or Subcutaneous (SC) SACT

Subject 4: Administration of Intravenous (IV) SACT

Subject 5: Pre-Treatment Consultation (All Routes)

Subject 6: Pre-Treatment Consultation for Oral SACT

Accreditation:

NMBI Category 1 approval 16 CEU's

No of Places Available:

12

Target Audience:

Registered Oncology Nurses working in the Irish Health Service registered with NMBI

Facilitators:

This national programme will be provided by the Centre of Nurse Education in collaboration with Nurse Tutors, Clinical Nurse Specialists, Clinical Nurse Managers, Oncology and Haematology Nurses, Nurse Educators and Facilitators, Medical Oncology and Haematology Doctors, as well as other members of allied health professional teams such as Pharmacists and members of the Psycho-oncology team. Each programme will be supported by the National Cancer Control programme (NCCP).

Pre-requisites:

- Nurses must be registered with NMBI and be on the live register for 12 months or more
- Nurses must be working in cancer care for a minimum of 3 months.
- Nurses must complete the application form online through HSELand following discussion with the relevant manager with commitment to full attendance. The manager has full authority with regards to candidate selection as they are best positioned to ensure that a) the staff nurse has sufficient pre-requisite knowledge and skills to undertake the programme, and b) that staffing levels, supports and clinical assessors etc. are available.
- Nurses must have explored NCCP guidance documents and resources, local PPPG's as well as other recommended reading.
- Nurses must have achieved competence in intravenous (IV) administration of medicines by successfully completing an IV Study Day at local level.
- Nurses must have gained requisite competence related to medicines management, including calculations for medicine administration in accordance with local policy and have successfully completed Medicines Management on HSELand
- Nurses must have achieved competence in the care and management of central venous access devices (CVAD's) by successfully completing relevant training and certification at local level.

- Nurses must have achieved competence in peripheral venous cannulation and venepuncture by successfully completing relevant training and certification at local level.
- Nurses must have gained requisite competence in the management of anaphylaxis by successfully completing the National Anaphylaxis Education Programme for Healthcare Professionals on HSELand
- Nurses should have successfully completed Chemical Safety in the Workplace (Introduction) on HSELand.
- Nurses should have successfully completed the National Intrathecal Chemotherapy e-learning tool on HSELand.

Date	Venue	Time	Duration
7 th November	Centre of Nurse Education, 34 Henry Street, Cork	0800-1700	8hrs
15 th November		0800-1700	8hrs

* Nurses must complete the application form online through HSELand, following discussion with the relevant line Manager with commitment to full attendance. Programme Application following this process is via Classroom Management System on www.hseland.ie

New Graduate Transition Programme

Aim: To support transition from Student to Staff nurse. To further develop new graduates' skills and competencies.

Content:

Day 1: Respiratory Assessment and Airway Management

Day 2: Respiratory (Workshop)

Day 3: Medical

Day 4: Surgical

Day 5: Acute Life-Threatening Events Recognition and Treatment (ALERT)

Day 6: Deteriorating Patient Workshop

Day 7: Professional Development (Classroom)

Intended Learning Outcomes:

- To guide and support newly graduate Nurses
- Assist newly graduate Nurses to enhance their clinical skills and build confidence
- To prepare new graduates for their role as Registered Nurses and decrease transition shock
- To promote integration of theory to practice and assist new graduate Nurses to acquire clinical skills and further develop critical thinking abilities
- To further develop skills in communication, teamwork and decision-making
- Provide opportunities for peer-to-peer support and reflective practice
- To promote continuous professional development
- To support the retention of new graduate Nurses

Accreditation: Category 1 approval NMBI 35CEU's

No of Places: 24

Target Audience: New Graduate Registered Nurses, Mercy University Hospital, Cork

Facilitators: Registered Nurse Tutor, Nurse Practice Development Unit, Advanced Nurse Practitioners, Clinical Nurse Specialists, Clinical Facilitators and allied interdisciplinary team, Mercy University Hospital, Cork

Date	Venue	Time	Duration
Day 1: 14 th November 2023 <i>Respiratory</i>	Centre of Nurse Education, 34 Henry Street, Cork	8am – 5pm	
Day 2: 28 th November 2023 <i>Respiratory (Workshop)</i>			
Day 3: 29 th February 2024 <i>(Medical)</i>			
Day 4: 18 th April 2024 <i>(Surgical)</i>			
Day 5: 23 rd May 2024 Deteriorating Patient <i>(Workshop)</i>			
Day 6: 12 th September 2024 Professional Development <i>(Classroom)</i>			

*Programme only available for Mercy University Hospital Staff, Bookings through npduadmin@muh.ie

Preceptorship

Aim:

To prepare qualified nurses to undertake the role of Preceptor for undergraduate nursing students

Content: Learners complete a UCC online preceptorship Programme

Programme Outline:

Introduction to online programme

Unit 1 - The National Competence Document

Unit 2 - Roles and Responsibilities of the assessment team

Unit 3 - CAD explained - page by page

Unit 4 - Assessment and Feedback

Unit 5 - Reflection and Reflective Practice

Link to

Online programme <https://ucc.cloud.panopto.eu/Panopto/Pages/Sessions/List.aspx?folderID=f1367637-330f-4ebf-ab6d-ac0900a0cc71> which can be found on the UCC School of Nursing and Midwifery website [Preceptor Information](#)

At the end of each unit there is a very short evaluation form to complete, on completion of all 6 units a certificate of completion will be sent to the Preceptor and their Manager.

***This programme will run until online preceptorship education programme on HSELand is operationalised nationally, then the UCC online preceptorship programme link will be considered as a resource and will remain on the School of Nursing and Midwifery website.**

Following completion of UCC online preceptorship Programme Learners **must** then attend for a Virtual Preceptorship Workshop facilitated by the Centre of Nurse Education. Booking is via Classroom Management System on HSELand.

Certificate of completion of UCC online preceptorship Programme **must be forwarded** to Lorna Paterson, Clerical Officer cne@muh.ie in advance in order to be accepted for a place on the Preceptorship workshop.

Intended Learning Outcomes:

- Discuss the use of Steineker and Bells Experiential Learning Taxonomy as a framework to assess students' expected level of learning
- Review of Competency Assessment Document and Resources Available
- Identify supports available to staff and students when working as a preceptor
- Be able to structure and complete interviews and assessments with student nurses
- Be able to identify when and how to document feedback on a student's progress

Accreditation: Category 1 approval NMBI; 2.5 CEU's

No of Places: 25

Target Audience: Registered Nurses

Facilitators: Staff of the Centre of Nurse Education, Mercy University Hospital

Date	Venue	Time	Duration
23 rd November 2023	Centre of Nurse Education, 34 Henry Street, Cork	11.00 – 12.30	1.5 Hours

*Programme Application is via Classroom Management System on www.hseland.ie

The Nursing management of the adult with Type 2 diabetes: practical workshop programme

Aim:

This one-day practical workshop is designed to complement the knowledge and skills you have gained following completion of the eLearning modules:

- *The Nursing Management of Adults with Type 2 Diabetes Mellitus* on www.hseLanD.ie, and
- *Diabetic Foot screening and protection* on www.hseLanD.ie;

The aim of this practical workshop programme is to enhance those practical skills necessary to effect the optimum nursing management of the adult with T2DM. *All participants must present their certificate of completion of the online blended learning programmes to enable enrolment.*

Content:

- Blood glucose monitoring incorporating glucose meters, testing strips, injection devices and delivery, infection prevention and control, patient safety, injectables, injection technique and the management of hypoglycaemia
- T2DM Medicine Management in given scenarios/Case studies/Care planning; Q & A session
- Motivational Interviewing, integrating the five principles: Behavioural techniques.
- Assessment of the diabetic foot incorporating monofilament assessment, sensation, circulation, structural abnormalities, interventions and referral
- Healthy Eating and the management of T2DM, eating habits, portion sizes, food labelling, meal plans, food diaries. Referral pathways. - (practical session).

Intended Learning Outcomes:

On completion of the programme the participants will:

:

- Through experiential learning and hands-on experience, observe and experience the optimal functioning and use of recommended blood glucose meters, insulin delivery devices and injectables, while promoting safe, quality patient care;
- Demonstrate prompt management of the adult with hypoglycaemia;
- Using role play, promote patient empowerment by utilising motivational interviewing techniques and specific behavioural approaches, positively influencing adults' self-management of their diabetes.
- Demonstrate the importance of nutritional management through engagement in dietary demonstrations, label reading practice, meal planning and determination of portion sizes through problem solving activities and reflective discussion;

- Identify the characteristics of the ‘at risk’ foot through practical assessment techniques, promoting effective treatment decisions, initiating further investigations and knowing when to refer to and engage specialist services;
- Engage in medicine management of the adult with diabetes through varied practice based scenarios and reflective practice

Accreditation:

Wound Care Conference.

Aim:

The aim of this one-day conference is to provide up to date education for registered nurses regarding specific elements of wound care and an opportunity to enhance their delivery of care with a specific focus on lower limb ulceration.

Content: A number of theoretical components including differentiating and assessing various types of wounds and practical workshop demonstrations.

Intended Learning Outcomes:

- Wound assessment
- Differentiate between venous and arterial leg ulcers
- Be able to assess and manage a patient/client in the community with venous/arterial leg ulcers
- Perform leg bandaging as appropriate
- Update on various wound products available

Accreditation: 7 CEU Credits

No of Places: 35

Target Audience: Registered General Nurses working in the Community setting.

Facilitators: Siobhan Buckley Nurse Tutor Mercy CNE (course coordinator) and invited nurse specialists in tissue viability.

Date	Venue	Time	Duration
29 th November 2023	Centre of Nurse Education, 34 Henry Street, Cork	8.00am-3.30pm	7.5 hours.

*Programme Application is via Classroom Management System on www.hseland.ie
